GF PRO
AUTOMATIC SNOW AND ICE MELTING CONTROLLER

PRODUCT OVERVIEW

The ETI® GF Pro is an automatic snow and ice melting controller for pavement, sidewalks, loading docks, roofs, gutters and downspouts in commercial and residential environments.

The GF Pro interfaces with up to two sensors, (any combination of CIT-1, GIT-1 or SIT-6E) to meet site requirements. The controller features automatic and manual-override operator controls. The adjustable Hold-On timer continues heater operation up to 8 hours after the sensors stop detecting snow or ice to ensure the rest of the slab has completely dried. The Heater Cycle control button allows manual initiation or cancellation of a heating cycle. The optional RCU-4 remote control unit can be located for convenient monitoring and control. These flexible control options provide complete snow melting and water evaporation at a low operating cost.

The GF Pro also features a built-in 30 mA, self-testing Ground-Fault Equipment Protection (GFEP) capability, digitally filtered to minimize false tripping. A ground-fault alarm must be manually reset using the Test/Reset switch before heater operation can continue.

The GF Pro is housed in an environmentally-sheltered Type 4X enclosure and weighs only 3 pounds. The GF Pro is a snow and ice controller for medium-sized applications whose features and power requirements do not require an APS or EUR Series control panel. For complete information describing application, installation, and features, please contact your Pentair Thermal Management representative or visit www.pentairthermal.com.

GENERAL

Area of use
Nonhazardous locations

Approvals

Also evaluated by Underwriters Laboratories Inc in accordance with UL 1003 Ground-Fault Sensing and Relaying Equipment
ENCLOSURE
Protection: Type 4X
Dimensions: 5 1/2” (L) x 8 1/8” (W) x 4 3/8” (H)
140 mm (L) x 207 mm (W) x 112 mm (H)
Material: Polycarbonate
Cover attachment: Polycarbonate cover, machine screws
Weight: 3 pounds (not including sensors)
Mounting: Wall mount
Entries: 2 x 3/4” entries (right) for NEC Class 2 connections
3 x 1-1/16” entries (bottom and left) for supply and load power

CONTROL
Supply voltage: 100-277 Vac; 50/60 Hz
Load: 30 A maximum resistive
Heater Hold-On timer: 0 – 8 hrs; actuated by snow stopping or toggle switch
System test: Switch toggles heater contact on and off. If temperature exceeds optional high limit
thermistor [45°F], heater shuts off to reduce costs and prevent damage

FRONT PANEL INTERFACE
Status indicators:
- SUPPLY (green): Power on
- HEAT (yellow): Heating cycle in progress
- SNOW (yellow): Sensor(s) detect snow
- GFEP (red): Ground-Fault condition
- GFEP (red, flashing): Failed
- GFEP (red, rapid flashing): GFEP test in progress

GROUND-FAULT EQUIPMENT PROTECTION (GFEP)
Set point: 30 mA
Automatic self-test: GFEP verified before contactors operate; GFEP runs on start-up and every 24 hours
Manual Test/Reset: Test/Reset switch on front panel

ENVIRONMENTAL
Operating temperature: –31°F to 130°F [–35°C to 55°C]
Storage temperature: –67°F to 167°F [–55°C to 75°C]
